

{loadposition sort}

I strongly support an all-of-the-above energy approach that includes development of natural gas, clean coal, and American produced oil, as well as alternative energy sources such as wind, solar, hydropower, nuclear, geothermal and biomass. This plan will create new job opportunities in Florida and throughout the country while making us less dependent on foreign energy.

Now is the time to make America energy-independent by encouraging the indomitable spirit of American ingenuity and developing our full spectrum of energy resources. America must look at energy independence much the same as having a diversified investment portfolio built upon the solid foundation of proven methods in both energy extraction and economic development.
